📄 Anh-Duy

Summary

Third-year Artificial Intelligence student with hands-on research in time-series ML, computer vision, and MLOps. Built end-to-end pipelines and a first-author manuscript under journal review. Seeking an AI Engineer internship to develop production-ready machine learning systems and bridge research with real-world applications.

Education

B.S. FPT University , Artificial Intelligence	Da Nang, Viet Nam
• GPA: 8.8/10.0 · Top 100 students (2026) · 70% merit scholarship	Sept 2024 – Sept 2027
• Coursework: Machine Learning, Deep Learning, Computer Vision, DSA, Database Systems, Natural Language Processing, Data Mining, Probability & Statistics	
FPT High School	Da Nang, Viet Nam
• GPA: 9.3+ · Top honor · 30% merit scholarship	Sept 2021 – May 2024

Projects

MLBII — Bidirectional Iterative Imputation for Time Series	Jan 2026 – July 2026
First-author manuscript under review at <i>Engineering Applications of Artificial Intelligence</i> .	
• Built a PyTorch + scikit-learn framework for imputing long continuous gaps in multivariate time series; NSE 0.9359, outperforming SAITS & BRITS.	
• Reduced compute time by up to 97× vs BRITS; validated on 43 meteorological stations across Vietnam (Pandas, NumPy, Seaborn for analysis & viz).	
Tiny Object Detection via Anisotropic Log-Wasserstein (ALW)	Jan 2026 – present
• Proposed ALW, a Gaussian-based loss with anisotropic, scale-invariant modeling for tiny-object localization on COCO.	
• Integrated into Faster R-CNN (ResNet-50 / PyTorch); AP@50:75 of 0.1899, outperforming prior Gaussian-based losses.	
Flood Forecasting with Multi-Source Satellite Data	Jan 2026 – Mar 2026
• Designed an automated ETL pipeline for daily flood forecasting using Google Earth Engine, Apache Airflow, Docker, and PostgreSQL.	

Certifications

All-in-One (AIO) 2025 — 4 Certificates

- Data Science · Machine Learning & Deep Learning · NLP & Computer Vision · Large Language Models

Competitions & Activities

- ICPR 2026 — Participated in the License Plate OCR competition (International Conference on Pattern Recognition)
- Presented at ResFest · ResConnect · Web Design FPT Education 2026
- Mentored a finalist team in the FPT AI & Robotics Competition 2025
- Third Prize — Science & Technology Competition, FPT High School (2024)

Skills

Programming: Python, SQL, LaTeX, Git, REST APIs, CUDA

AI / ML: PyTorch, TensorFlow, Scikit-learn, OpenCV, Hugging Face, LLM APIs, Ollama

Data & CV: Pandas, NumPy, Seaborn, Matplotlib, Librosa, COCO tooling

MLOps / Backend: Apache Airflow, Docker, FastAPI, Google Earth Engine, automated data pipelines, Vercel, UptimeRobot

Databases: PostgreSQL, MySQL, MongoDB

Spoken: Vietnamese (Native), English (Intermediate)
